Patient Monitors

In every operatory and patient exam room there are two mounted monitors. With our fully digital patient record management system, digital x-ray system , and intraoral photo system, we can show you, from the comfort of the dental chair, everything that we see to educate you towards making the right decision for your oral care.

In addition to patient education we can entertain you with Netflix On Demand movies and TV shows during your dental procedures. We can provide headphones to block out the dental noises. Before you know it, your procedure will be over and you can walk out relaxed and proud of your exceptional dental care.
